Education

Ramrao Adik Institute of Technology, D.Y. Patil University Navi Mumbai, India
B.Tech in Computer Science (AI & Data Science) Aug 2023 – July 2027
CGPA: 9.62 / 10.0

Experience

Open Source Contributor, IEEE Student Branch, GEHU *Aug 2026 – Present*
Uttarakhand, India · Remote

- Improved sprint delivery reliability on **FinOpsSentinel as measured by** on-time completion of assigned issues **by** owning tickets end-to-end in **Python** (debugging, implementation, code review) in an **Agile/Scrum** cycle.
- Reduced integration risk on a distributed open-source codebase **as measured by** clean merge rates **by** applying problem-solving skills to production-oriented issues and incorporating reviewer feedback in **code reviews**.
- Strengthened team velocity **as measured by** faster review turnaround **by** communicating with maintainers and mentors via Git/GitHub workflows, peer reviews, and **teamwork**.

Projects

Ganraj Logistics Service: Dispatch & Live Driver Tracking Platform **Code** *October 2026*
Tech: Java 21, Spring Boot 3, JPA, MySQL, Kotlin, Jetpack Compose, Next.js, Firebase FCM, AWS, Docker

- Delivered an end-to-end logistics platform **as measured by** three integrated components (web booking site with dispatcher admin panel, **Java/Spring Boot** backend, **Kotlin Android** driver app) **by** owning design and development across web, backend, and mobile, with a documented **AWS** deployment (EC2, RDS, Nginx, Docker, GitHub Actions CI/CD).
- Secured the order workflow **as measured by** 10 **REST APIs** with role-based JWT auth (Dispatcher/Driver) and service-layer driver-order ownership checks **by** implementing an order-status state machine with **Spring Security**, **JPA**, and **MySQL** schema versioned through Flyway migrations.
- Enabled real-time field operations **as measured by** background **GPS** upload with offline retry and push alerts on new assignments **by** integrating **Fused Location**, **Google Maps** (Maps Compose), WorkManager, and **Firebase Cloud Messaging** with a rate-limited location-ingestion API.

ORION-Health: Neural Triage **Code | Live** *August 2026*
Tech: Python, React.js, FastAPI, LightGBM, Groq

- Built a real-time clinical inference service **as measured by** urgency scoring across a **5-agent pipeline by** architecting Observer, Planner, Explainer, Action, and Learner agents on **FastAPI** with a **React.js** frontend, LightGBM, and **LLM** (Groq) API explanations.
- Automated release quality **as measured by** a **7-stage CI/CD pipeline** (validate, lint, train, monitor drift, build, deploy) **by** setting up GitHub Actions from scratch to automate **ML pipeline** retraining.
- Delivered a working product under a compressed timeline **as measured by** a fully demoed hackathon build **by** leading a 2-person team as **Team Lead** for HackMatrix 2026, driving **teamwork**.

TrueChain (SafeVoice) **Code| Live** *August 2026*
Tech: Next.js 16, FastAPI, SQLAlchemy/SQLite, Fernet (AES-256), JWT

- Delivered a full-stack anonymous reporting platform **as measured by** a live, demoable Round 3 prototype **by** leading full-stack and cryptographic design as **Team Lead** at **Omnikon National Hackathon 2026**.
- Eliminated identity-leak risk in whistleblower reports **as measured by** a **SQL** database schema with zero PII-storing columns **by** designing the data layer (SQLAlchemy, **REST APIs**) with no name, email, or IP fields.
- Made backend tampering cryptographically detectable **as measured by** instant hash-mismatch on any modified record **by** implementing an append-only SHA-256 hash-chain ledger with AES-256-encrypted evidence storage.

Publications

Real-Time Clinician Sentiment to Steer Adaptive AI in Critical Care Decisions IEEE Xplore, *IEEE IC3ET 2026*

Skills

Languages & CS: Java, Kotlin, JavaScript, TypeScript, Python, SQL, C/C++, Data Structures & Algorithms, OOP, DBMS
Backend & Web: Spring Boot, Spring Security, JPA, REST APIs, JWT, FastAPI, Node.js, React.js, Next.js, HTML5, CSS3
Mobile: Android (Kotlin, Jetpack Compose), MVVM, Hilt, Retrofit, Fused Location, Maps SDK, Firebase Cloud Messaging
Databases: MySQL, PostgreSQL, SQLite, MongoDB, Redis
Cloud & Tools: AWS (EC2, RDS), Azure, GCP, Docker, Git, GitHub Actions, CI/CD, Jenkins, Agile/Scrum, Code Reviews **ML & AI:** Machine Learning, MLOps, LLMs, RAG, Prompt Engineering, LightGBM, LangGraph, Pandas, NumPy

Certifications & Achievements

- **IBM (edX): Python Basics for Data Science**, **Data Visualization & Dashboards**
- Ranked among the **Top 15** teams out of **157** at **Codeathon 2026**, VIT Mumbai.
- **Advanced through 3 rounds** at **Omnikon National Hackathon 2026** – top-10 final finish from 3,100+ submissions.
- **IEEE Summer of Code 2026**: ranked **26th nationally**; **Samsung Innovation Campus (SIC) 2025** graduate.
